Date: September 19, 2026

Dear Waqar,

The HAUSKU webshop is nearly complete: legal pages, payment infrastructure, security hardening, transactional emails and the new design system are all implemented and tested. Before we can schedule the launch, we need exactly THREE things from your side. These are the only launch blockers remaining — nothing else is holding up development.

### 1 Stripe API Keys (Payments)

**PRIORITY: CRITICAL — WITHOUT THIS, NO ORDER CAN BE PLACED**

Why we need it: All payment code is ready, but the keys in the environment are placeholders. As soon as real credentials are configured, payments work end-to-end.

Please provide (test mode now, live mode at launch):

|                               |                      |
|-------------------------------|----------------------|
| <b>STRIPE_SECRET_KEY</b>      | begins with sk_test_ |
| <b>STRIPE_PUBLISHABLE_KEY</b> | begins with pk_test_ |
| <b>STRIPE_WEBHOOK_SECRET</b>  | begins with whsec_   |

Where to find them: Log in at [dashboard.stripe.com](https://dashboard.stripe.com) > Developers > API Keys > copy the test-mode keys (click 'Reveal test key' for the secret key).

Once received, we will run a full payment test (test card + webhook verification) before going live.

### 2 AGB (Terms & Conditions) — Final Approval

**PRIORITY: CRITICAL — LAST LEGAL RISK BEFORE LAUNCH**

Why we need it: The AGB text was taken from the Haendlerbund template and adapted from eBay to a web shop. German law expects the published terms to match the actual shop. Your final sign-off removes the last open legal risk.

Please confirm one of the following:

- ☐ Approved as adapted — publish the current web-shop version
- ☐ Revised text follows — you send the final wording and we implement it

Additionally, please confirm the Datenschutzerklärung (privacy policy) matches your actual business practices.

### 3 Tracking & Analytics Decision (Cookie Consent)

**PRIORITY: CRITICAL — DETERMINES CONSENT BANNER SCOPE**

Why we need it: German law (TTDSG / DSGVO) requires a cookie consent banner whenever tracking tools are used. Currently NO tracking is installed. Your decision here tells us whether to build the consent banner and which services to integrate.

Tick everything you would like — or tick 'No tracking':

#### **Analytics / Advertising:**

- ☐ Google Analytics 4
- ☐ Google Ads conversion tracking
- ☐ Meta (Facebook) Pixel
- ☐ Hotjar or other heatmap tool: .....

#### **Other:**

- ☐ Newsletter integration    Provider: .....
- ☐ Chat widget                      Provider: .....

☐ **NO tracking — launch without analytics (no consent banner needed; can be added later)**

---

## **What Happens Next**

1. Day 1-2: Stripe keys arrive > configure, run payment tests end-to-end.
2. Day 1: AGB sign-off arrives > legal pages final, risk closed.
3. Day 2-3: Tracking decision arrives > consent banner built if needed.
4.            We set a firm launch date together.

If anything is unclear, just reply to this message — we are happy to walk you through any item step by step.

Best regards,

**HAUSKU Development Team**
